## Let's Talk About...

**Be heard!** Discuss new titles with other eMatter computing buffs.

[Programmer's Introduction to PDF](#) by Kas Thomas  
PDF cram course. Learn how PDF files are organized, understand data types and operators, find out how Acrobat handles incremental updating and get to know PDF's hidden capabilities.

[XML Magazine, Premiere Issue](#) by Fawcette Technical Publication  
XML from every angle: overviews of technology and terminology in e-biz applications; mixing it up with Java and Visual Basic; XML in Oracle 8i; Oasis and Biztalk standards; and XML in enterprise computing.

[Mastering HTML 4](#) by Deborah S. Ray, Eric J. Ray  
A guide with real-world examples, this eMatter covers the A to Z of HTML -- from formatting basics to DHTML -- and also includes integration of Java, JavaScript, Active X and multimedia.

[CCNA Exam Notes: Cisco Certified Network Associate](#) by Todd Lammler  
Peruse this eMatter -- then get a good night's sleep before the test. A low-cost alternative to other study guides. The author has written major study guides for Sybex and Network Press.

[Convergence 2000: Broadband, DVD, Web, and other Hybrid Media in the Near Future](#) by Joe Matheny

"New Media" is the new frontier, and it's evolving at a dizzying rate of speed. Without the usual hype, author Joe Matheny offers a roadmap. [More from Matheny.](#)

## Joe Matheny on convergent technologies

By Joey Leslie

New media Renaissance man Joe Matheny has pursued multimedia interactive experiences for a decade. And in his extremely current eMatter, [Convergence 2000: Broadband, DVD, Web, and other Hybrid Media in the Near Future](#), he pursues them further.

"Emergent experience" -- that produced as a result of the combination of experiences and greater than any individual one -- is not new to Matheny.

After graduating from college with cinematography and philosophy majors, he came up with a new creation: a book with an accompanying videotape and audiotape designed to be used together to produce a so-called emergent experience.

"I have always been interested in the telecommunication matrix covering the planet," Matheny said.

"I think of it metaphorically as the planetary mind, a way to pull it all together." Matheny experimented with early bulletin board systems like The Well to create "additive fiction," stories that enticed others to add chapters in an "interactive story." The best known of these, [The Incunabula Papers](#), is still alive and well here at MightyWords.

After experimenting with several early Internet technologies, Matheny landed at Adobe Systems and headed up the Adobe Acrobat Reader program. He got bored. More precisely, he saw technologies on the horizon that would help him realize his vision of the "emergent experience."

"DVD allows for broadcast quality video on a disc," said Matheny. "It's digital. You can't do this with VHS. You can't do this with a CD-Rom or a video codec. DVD is anamorphic. It works on a PC and on a set-top system. It allows interactivity and a Web connection." Matheny believes that DVD is the "true broadband."

"Here's the thing," argued Matheny, "We are hearing a lot of hoo-ha about broadband because it's an investment topic. What's being sold to investors is not a reality. Broadband means DSL, cable modem. It means sending current data across a wire faster, with more immediacy. It cannot send anything approaching broadcast quality video."

Matheny says that DVD will change the definition of "broadcast."

"Currently, broadcast means one thing to many. There is no interaction with the information. Information is homogenized to appeal to as many people as possible."

Matheny predicts that DVD and other emerging technologies will dramatically change this.

"As a viewer, I am no longer passive. This changes the way you perceive the world in a fundamental way."

It will be an uphill battle, he says. "We are taking on a model that has been here since Gutenberg."

Matheny believes that television has become the modern cultural equivalent of sitting around the fire, telling stories. Using convergent technologies, Matheny hopes to change the habits of the average American.

"By forcing the receiver and sender of information to do things in a fundamentally

different way, the entrenched media culture is changed. Couch potato culture is changed. Water cooler culture is changed."

The revolution has already started with printed media.

"MightyWords took a chance. They were the first to realize that information regarding emerging markets changes quickly. There is an exponential growth of information. The format allows people to make command decisions correctly and with current information."

And, he added, "It's also cool to be on the same page with Arthur C. Clarke."
